## Pads

Even at the first listening, anti-resonance Authentic Audio Image pads **MINI | MIDI | MAXI | MAXI+** differ much from the number of other similar products on the market.

Their inimitable, positive effect can be perceived immediately, because the use of these products reveals the hidden, unknown potential of any audio device, component or speaker. The extraordinary effect is positively demonstrated in all sound parameters making the sound stage is huge, localization of the instruments is very precise, dynamics is amazing, the colors of the sound of musical instruments becomes very natural; the sound does not tend to blend together even at high volume.

In the production of anti-resonance pads - as with all our products - we use materials processed and modified with our unique **IST** technology.

**MAXI** pads are attachable to all common threads under the speaker. They are available with or without a thread.

**MAXI+** pads are height adjustable.

<b>Mini</b>	95 €
<b>Midi</b>	180 €
<b>Maxi</b>	250 €
<b>Maxi+</b>	270 €

## Power Distributors

Like all our products, the power distributors are based on an extremely efficient and effective unconventional solution, which consists in the use of our unique technology **IST** (Interference Suppression Technology).

No limiting elements, such as voltage regulation or filter circuits and transformers are included; it is a revolutionary, purely passive solution that distributes voltage in the purest possible form into your electronics, making it obvious and perceptible instantly in any audio or video system. All the materials from which the individual components are made, including connectors, conductors, insulators, have been subjected to a modification process in order to achieve unique properties in connection with the elimination of accompanying negative phenomena, i.e. electromagnetism and resonances.

<b>Unisono 8</b>	2 900 €
<b>Unisono 12</b>	3 500 €
